PROJECTS

Sign Language Interpreter
• Machine Learning application that processes video of a user signing and translates ASL phrases into English
[JavaScript, React, Node.js, Express.js, Python, Flask, GCP, REST API]

Momentous
• Social media application, user authentication, post photos with captions, follow friends, like and comment on posts utilizing MySQL Database to store and retrieve information
[HTML, CSS, PHP, MySQL, RDBMS]

Blog Site
• Reads .mdx files from separate GitHub repo utilizing API, features image and video embeds, posts include tags and display related posts and deployed on vercel
[Typescript, Next.js, React, HTML, CSS, REST API]

WORK EXPERIENCE

Automated Phone Call Service Design (Freelance)
📅 September 2021 - May 2022   📍 Remote

• Assist in development and design of IVRs for insurance companies to increase efficiency and productivity
• Handle and process user information securely to provide correct responses (JSON)

RELEVANT COURSES

Database Systems
Machine Learning
Software Engineering
Compilers
Data Structures
Data Science
Interdisciplinary Collaborations

CAREER OBJECTIVES

To secure a software engineering position that allows me to leverage my strong background in computer science and problem-solving skills to design and develop efficient and effective software systems

EDUCATION

B.S.
Computer Science University of Kansas August 2018 - May 2023
Lawrence, KS

SKILLS

Strong: C++, Python, Javascript, React, HTML/CSS, MySQL, API, Machine Learning, AI, Typescript

Familiar: MongoDB, Express, NodeJS, Haskell, C, Next.js, postgres, Vercel, Firebase, GCP
